WOMEN AND THEIR WORLD.

The Latest Creations of the Rulers of Fashion's Realm.

A Street Costume That is Very Smart and Quite Novel.

The Newest Things in Bonnets-Hints for the Boudelr-Amelia E. Barr Writes About Lovely Old Ladies The Beauty of Autumn of Life-Receipts for Easter.

The creators of fashions are busy with the new Spring and Summer styles, and their minds are now exercised trying to look shoud a few weeks. But as their ideas go forward, their thoughts go back more and more to the old pictures, and fashion sheets of the time of Louis XVI. This is noticed in everything, from hat to shoo. Even the quaint little bags and reticules of our great grandmothers are again coming

Skirts are still worn plain, with either a rouleaux of velvet or narrow fur at the edge: as Spring advances, of course, the fur will be dropped. Black will not be as much in favor in the near future as it has been in the past. The new shades of brown will be the color and light shades in all colors will prevail. Cropous and croped goods will: continue all through the coming season among the leading materials. This beautiful and faseinating material comes in the daintiest tints, and of a heavier make than formerly. The edge of some of the goods comes with a crosswise stripe of mirrow i lace or ribbon, and is usually croped into the material. This year the dresses will be much plainer than for years post and heavy rough materials greatly in vogue for street wear. Among the popular trimmings are galoens composed of leather cut in the form of small flowers. The leather has a smooth dressed surface like morocco, in such colors as cream worked with iridescent beliotrope bends, green with gold, mauve with gold, and so on, according to the wearer's individual taste. The thick white lace insertions are edged with leather worked in brown, gold and the new shade called "mediterranean blue," and these also having the fringes of paniettes are much fancied trimming. Lace and velvet will continue for the demi-calson and velvet will be used as trimming for dress-skirts as well but must barmonize with the shade of the goods. offering no noticeable contrast.

The above shows one of the most taking hats of the season. It is made from paroquet's wings, pale blue velvet and pink velve

The above Illustration is a French bodice made entirely of Louis XVI ribbon, vest and broad collar in point d'Angleterre; ruffles of pale pink silk muslin finish the short nuffed sleeves. Hair dressed high in pointed knot with pink bow. Skirt accordion. pisated of blue gauze. Fan of lace and

Among the beautiful fabrics seen for sumable for trimmings, cool looking ginghams,

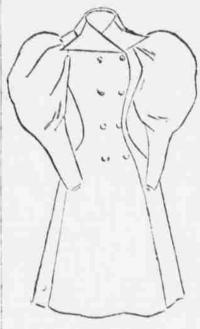

batistes, and wash erepons. Never have the factories sent forth more color as materials which cost three and four dollars a yard. The array is simply bewildoring. Among the novelties offered is the illuminated wool duck, used for tailorgowns. A decided ald to the ladies who have not perfect faith in their dressmakers, is the almost ready-made dresses, needing but a triffe of putting together to be ready for wearing. The skirts of the latter are cut and gored and the insertions of lace or other woven trimming set in, needing only the band to make them compete. The material for the waist is planned out together with

the sleeve and waist trimming. The handsomest street outfit I have seen this spring was a plain full skirt of black moire, with long paddock coat of same material, white glazed kid gloves stitched with black patent leather shoes, muff of the moire and black lace, surmounted with a bunch of natural violets, black jet and lace small bonnet, and another bunch of violets under the chin. The tout ensemble was the most fetching it has been my good fortune to see in many months.

Among the porelties is an overdress or oning the breath. Clear listerine is also nobler future. Beautiful the faded hair and butterflies have 500 eyes.

upper skirt hanging straight to about mid- good for removing a superfluity of dandruff complexion; the softer smile, the tenderer way of the underskirt, and gradually sloping from the head. backwards towards the back and bottom of the lower skirt. It is a sort of revival of our first overskirts of forty years ago.

matter, is complete without the hair being ing to this strictly, any lady can always have hair with whiter laces, and covers her neel well dressed. All faces are not suited to soft fluffy bangs, NEW THINGS FOR HOUSE AND STREET, the Greeian knot, and often when features and form are in keeping the effect is spoiled by a smoothly plastered head, the sight of which would make even a statue blush. The fine part and fluffy waves now used, will ABOUT LOVELY OLD LADIES. which would make even a statue blush. The make even a plain face comely. Bangs have disappeared entirely and the fascinating Some of the Noble Types that are single curl on center of the forehead continues to hold its own. It certainly lends to add youth to any face, chie even to a plain face, and a beautiful one it makes irresistible. The hair may be worn either high or low, or half way between the two.

dock coat of which the above is a good mature years, they dishonor, proves even a poorly shaped figure.

HOW TODDLERING GOT 198T.

He Pett in a Coal Role, but Was Found after a bong and Weary search.

Toddlekins was the most bake on the street. Toddfeirms was just able to walk, and to see him tolders the with his soonldors all humped up, as it has expected to some down on the end of that butle turn-up are set between the billion of the same was not found for anything. For a maximum and not the others and such total for when Toddo-kins began to water. Bown by your governthen he would look up so surprised and his "No replied the lad "while it was not rull choose would not relate and he come his little Pas bonnet. He would not gueswhat they were all learning at. Shows the little tricky colored but was appropriately a said Mana was too risky.

So Mary, Totallekille stater, with twelve years old, was end out to let Toddle-"But the mother, what would she do if we But Mary, though she here! This ship is eyed as on the day we started from Ojo Caliente.

While the soldiers and engineers always kept within sight and supporting distance of cach other, Pedro wandered away at his own sweet with. Sometimes he would start off in the morning and we would not see him again but he was a long at might and supporting distance of the soldiers and engineers always to save himself when his poor lather was faching do Apaches; and point at meand say, There goes Pedro though the soldiers of the very though the same and obterming the supporting distance of the save who all off the same was summy and the sam race with the war result; street, and sales, his utile blue cleab and sale shoot for big dog, and stamped his loot, Mary tog-and seeing sally at the front does or her home. our over where Sully was just to take a peop-st the latest fashions. Sin ourse toget Tol-diskins, the doll was as lovely, but Tordis-kins was a maxima short, and pulsing his hand out of Mary's in scarted off. Sully in 1 'Yes, on Don,' for I know it would be to run opstairs at 1 cs. a local deals clock to learn for him to try to get out of the stock. show to Mary and Mary and local the deal over, and when Sally come down there were che, and also and so much years of the dalle, that Toodlekins was longotten or at least for

> When Mary looked around there was no Toddlekins in sight. No wagen had gone by "Yes, senor," he said without an instant's besitation.
>
> "And de you think you could get back to your horse, to-might?"
>
> "I am sure I could."
>
> "And you are willing to try ut"
>
> "Although in command of the party, I thought it better to tell my purpose at chock to my companions; then shielding a candle so that the fight could not be seen outside the steetade, I wrote a note to the commandant at Fort Whipple, outlining the situation, and asking for specify assistance.
>
> This note I gave to Pedro, who concealed to cutside his tunic. The cook placed some food in a haversack that could harp from his shoulder, as he made his way back, and then be filled his canteen at the spring and said he was ready.
>
> His father caught the boy to his breast, and I heard his sets as he kiesed him good by Those nearest him pressed the youth's hands and his law, work were beforede, van the last of the lock was engaged in the search. There were as money people around as at a lire, but not at more of a half down to be seen cutside the best carried of the tipe. To delickins the law is the law to have the addition. Not a person line we have the result force. Mamma amos faulted with the read carried of the law to the read gone. How could a child that we find the gone if we carried of the law to the read gone. How could a child that we find the seal and so the structure, and and so the law to the read gone. How could a child that we find their sould not be seen outside the sould and seen in thing. See the policies in the law to the read that the law to the read gone. How could a child that we find the law to the read gone. How could a child that we find the law to the read gone. How could a child that we find the law to the read gone. How could a child that we find the law to the read gone. How could a child that we find the law to the structure. All the policies and the law to the send that we find the law to the send that the law to the send that the law to the law to the law to t that Toddickins could have been carried

that he was far from being indifferent to what was going on about him.

One day in a fit of confidence, the father told me that Pedro's wanderings were larged in the direction of that awful chasm. The country, and so be able to guide when he became a man.

It is said "familiarity breeds contempt;" but I think it would better express it to say, "familiarity breeds indifference." We soon grow accustomed to the boy's ways, and he became a pet of the engineers and of the rough, bronzed soldiers of our escori.

After three months hard work, we reached the northern spurs of the San Francisco mountains in Arizona, and here, for the first thing in the leading shart the work as many feeple in the least.

It heard his sects as he klosed him good by:
Those nearest him pressed the youth's hand as at a lire, but not ene could help in the least.

The section of that awful chasm:

"Do not lose heart, comrades, I shall reach the least."

To not lose heart, comrades, I shall reach the seat below, and softly said: "I fink a man in a balloon came down an 'earned off poor Todifickins." Well, that was nour a small the street, and as at a lire, but not ene could help in the least.

It is said "familiarity breeds contempt;" but I think it would better express it to say, "familiarity breeds indifference." We soon grow accustomed to the boy's ways, and he became a pet of the engineers and of the rough, bronzed soldiers of our escori.

After three months hard work, we reached the northern spurs of the San Francisco mountains in Arizona, and here, for the first that awful chasm:

The beat a word would not have the youth's hard in his hard in his hard. World what beleast.

It himk it would better express it to say, that I am very sare, desporate though our sit, but I am very sare, desporate though our sit, but I am very sare, desporate though our sit, but I am very sare, desporate though our sit, but I am very sare descended to the wash to an abilicence was a line out in his said with his head in his hinds or vising our sit, but I am very we were in the vicinity of the Apaches, whom we were so eager to avoid. After that our sleep was not so peaceful as it had been.

Judging from the signs our guide thought there were at least two hundred people in the Apache band near by, and he frankly told us that it would go hard with our little party, if the Indians attacked as with all their force.

The my anxiety for the boy's safety, I quite forgot the danger in our front. I remained near the edge of the black gorge, fearing every second that I would hear a loosened stone thundering down, and announcing that the boy had lost his foot-hold, or a herrified series in the little party, if the Indians attacked as with all their force.

The my anxiety for the boy's safety, I quite forget in the logic the danger in our front. I remained name to safety, I quite forget the danger in our front. I remained name to have the want out of sight in a minute. As he went down he said in a minute. As he went down he said in a minute. As he went down he said in a minute. As he went down he said in a minute. As he went down he said in a minute. As he went down he said in a minute. As he went down he said in a minute. As he went down he said in a minute. As he went down he said in a minute. As he went down he said in a minute. As he went down he said in a minute. As he went down he said in a minute. As he went down he said in a minute. As he went down he said in a minute. As he went down he said in a minute. As he went down he said in a minute. As he went down he said in a minute. As he went down he said in a minute. As he went down he added to the cover slipped back t One afternoon the Indian signs were so hearts, all the listeners fervently thanked while papa and mamma would not sleep a wink, thinking what had become of their delegation would not sleep a wink, thinking what had become of their delegation would not sleep a wink, thinking what had become of their delegation would dear, dear little Teddiscins. When Jurgest
